DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-26 and 35-36, drawn to an adhesive tape and a combination containing the same, classified in class 428, subclass 355R.
 - II. Claims 27-34, drawn to a method of making an adhesive tape, classified in class 427, subclass 208.4.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by a different process, such as one that requires UV radiation for curing instead of heat.
3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification and their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. Should Group I be elected, Applicants are required to elect one of the following species:
 - (a) Claims 1-5, 11, 13, 15-22, 25, and 35, drawn to an adhesive tape and a combination containing the same, wherein the adhesive comprises a polyurethane formed from a polypropylene glycol having a molar mass of more than 1000.

Art Unit: 1711

(b) Claims 6-10, 12, 14, 23-24, 26, and 35, drawn to an adhesive tape and a combination containing the same, wherein the adhesive comprises a polyurethane formed from a polypropylene glycol having a molar mass of less than or equal to 1000.

5. Should Group II be elected, Applicants are required to elect one of the following species:

(a) Claims 27, 29-30, and 33, drawn to a method of making an adhesive tape, wherein the adhesive comprises a polyurethane formed from a polypropylene glycol having a molar mass of more than 1000.

(b) Claims 28, 31-32, and 34, drawn to a method of making an adhesive tape, wherein the adhesive comprises a polyurethane formed from a polypropylene glycol having a molar mass of less than or equal to 1000.

6. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

7. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1711

8. A telephone call was made to Mr. Kurt Briscoe on March 16, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thao T. Tran whose telephone number is 571-272-1080. The examiner can normally be reached on Monday-Friday, from 9:00 a.m. - 5:30 p.m..

Art Unit: 1711
